

Inbound Lead Qualification & Routing Swarm

n8n workflow · 14 nodes · ID 5EjpPLqvYf9l75W7 · Endpoint POST /webhook/inbound-lead

STAGE 1 — ENRICH & SCORE

STAGE 2 — ROUTE & ACT

□ Trigger □ AI / LLM □ Logic □ Action / integration

Reliability: both LLM steps and all three integrations retry twice on failure. HubSpot, Slack and Gmail use **onError: continueRegularOutput**, so a CRM hiccup can never swallow the Slack alert for a hot lead. · **Before going live:** set **contactOwner** (AE owner ID), **listId** (nurture list ID), confirm the Slack channel, and fund the OpenAI API key.
